Not compatible with VPro+

Results worth smiling about

Case examples

estimated treatment time: 12 months
actual treatment time: 6.5 months

estimated treatment time: 19 months
actual treatment time: 6 months

estimated treatment time: 23.5 months
actual treatment time: 10 months

Patient results may vary. Case examples courtesy of Dr. Regina Blewins, Dr. Bill Dischinger, and Dr. Bella Shen Garnett respectively. Doctors may have been compensated for their participation. Estimated treatment time provided by treating clinician or calculated via estimated time with two week aligner intervals. 1-6 references available at www.proprioortho.com/references. **over not using the device.

How does it work?

High frequency vibration (HFV) is a trusted technology used to accelerate orthodontic tooth movement on a mechanical and biological level.

When used with clear aligners for 5 minutes a day, SureSmile® VPro™ delivers gentle vibrations that may reduce discomfort and speed up treatment by up to 50%.

1

Consult with your doctor

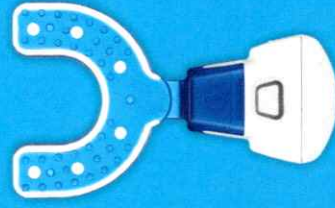

2

Use a SureSmile® VPro™ for 5 minutes per day

3

Smile big and smile often
